Professional Summary

Experienced AI practitioner with a track record of improving data pipelines, reducing inference latency, and building production-ready Python libraries, reinforced by formal coursework in Machine Learning, Deep Learning, NLP, and AI. Demonstrated ability to lead technical initiatives and community programs, delivering reliable AI solutions.

Education

St. Martin's Engineering College (JNTU Hyderabad)

2021–2026 (expected)

B.Tech in Computer Science and Design

Hyderabad, India

- Completed rigorous coursework in Machine Learning, Deep Learning, NLP, and AI, providing a solid theoretical foundation.

Experience

Weave

Nov 2025–Present

AI Trainer — Data Quality, Analytics & Management

Remote

- Reviewed and enhanced training data pipelines to improve AI model quality, ensuring reliable inputs for production systems.
- Collaborated with staff engineers to identify and reduce daily inference latency, improving AI agent responsiveness.
- Monitored live AI production, using API calls to remediate performance lags in real time.

Samagra

Jun 2024–Nov 2024

Data Science Intern — Code for GovTech (C4GT)

Remote

- Developed a unified Python package enabling cross-country economic policy simulations, showcasing software architecture and Python expertise.
- Integrated US and UK policy engines via a consistent API, streamlining cross-regional data access.

Leadership & Community

Google Developer Student Club (GDSC), St. Martin's

Jun 2023–Jun 2024

Lead

Hyderabad, India

- Founded and expanded a developer community to 800+ members, organizing technical events that fostered AI and software skill development.

Technical Skills

Languages: Python, Java, C, SQL

Areas: Data analysis, Machine Learning, Deep Learning, NLP, Computer Vision

Communication: Cold calling, appointment setting, objection handling, CRM tracking

Tools: Git, GitHub, Linux
